BIOGRAPH RECORDS

Since its inception in 1967, Biograph has preserved the passion, joy and pain, from which every form of modern popular music has grown. Their mission was to meticulously document what many consider to be the most important music ever recorded. They were the first to record and release piano rolls struck by Fats Waller, and Jelly Roll Morton, the very hands that created modern American song.

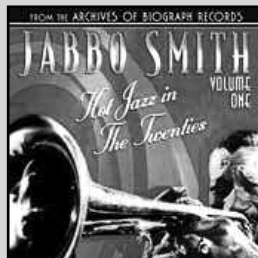

Working with the Library of Congress, they restored and released the legendary field recordings of Son House. They rescued master tapes from great independent jazz and blues labels like Dawn, Regal and Melodeon that would have otherwise been forgotten. With these new releases, Collectables Records is proud to assist in preserving this great label for the digital age.

THROUGH 4/30 — THE FOLLOWING LIST OF BIOGRAPH/COLLECTIBLES CDS ARE ON SALE FOR JUST \$10.99 ea!
